PROFILE

I am a full stack developer and future software engineer with 3 years of experience in web development. I have a solid background in frontend technologies such as React and Typescript. I also have experience in various languages and frameworks such as Dart, Flutter and React Native, as well as in backend technologies such as C#, Node.js and MySQL. I have collaborated on software development projects in a team environment, using tools such as Git and GitHub to track progress and manage code.

EMPLOYMENT HISTORY

FullStack Developer at ITOESTE, Argentina

November 2021 — Present

- Mysql
- React Web Apps
- React Native
- Node js
